Sampling Instructions:

1. For samples taken from baled, loose, or chopped hay:

1. Take 15-20 widely separated cores or samples from each lot.
2. The core sample should have an internal diameter of at least 3/8 inch and a length of 12-18 inches.
3. Mix the cores in a clean pail and place the entire sample in a clean plastic bag
4. Label samples with (Sample ID) and (Date Sampled).
5. Fill out sample submission form above.

2. For samples taken from Haylage and Silage:

1. Collect three to five handfuls of haylage or silage from the middle of the load as the wagon is unloading.
2. Mix and place them into a plastic bag and refrigerate or freeze until ready to ship.
3. Label samples with (Sample ID) and (Date Sampled).
4. Fill out sample submission form above.
